SSH Tunnel Plugin for Boardies MySQL Manager for Android

2 Contributors 0 Issues 1 Star 2 Forks

Best ssh tunnel android. Ssh tunnel android github. Ssh tunnel android no root. Connectbot ssh tunnel android. Ssh tunnel android apk. Remote ssh tunnel android. Reverse ssh tunnel android. Ssh tunnel android app.

Easily integrate Secure Shell (SSH) security into your Internet applications! The IPWorks SSH library includes SSH-enabled client, server, and proxy components supporting strong SSH 2.0 encryption and advanced cryptography. Download IPWorks SSH 2022 Beta Now Available! The latest version of IPWorks SSH features a modernized and streamlined experience, including a dedicated async version in .NET [learn more]. With IPWorks SSH, developers can rapidly build SSH secured applications including secure file transfer, secure remote login, secure email, and more. SSH is a low-level communications protocol providing security via strong encryption and advanced cryptography. Generic SSH component, Secure FTP (SFTP / SCP), Secure Remote Execution, SSH Secure Tunneling, and much more! Strong authentication, improved privacy, increased security, and optional compression for faster data transfer. Very easy to use, with a uniform, intuitive, and extensible design. Common component interfaces across platforms and technologies. Native software components for any supported development technology - with no dependencies on external libraries. Based on an optimized asynchronous socket architecture that has been actively refined for over two decades. Backed by an expert team of support professionals. Free Email Support for everyone. Premium Support also available for a fee. IPWorks and SecureBlackbox 2022 Betas are now available. Cloud Mail and SFTP Drive V3 are now shipping. Cloud Storage now includes support for ShareFile, and EDI validation functionality is now available in IPWorks X12 and IPWorks EDIFACT. IPWorks SSH is available as part of the Red Carpet Subscription. Download IPWorks SSH or read the full update details. IPWorks SSH is a suite of Secure Shell (SSH) enabled components for Internet development. Developers can build SSH secured apps using tools including a generic SSH component, Secure FTP (SFTP / SCP), SExec, SSHTunnel, etc. Support for SSH version 2.0. Security features include strong encryption algorithms such as AES GCM, ChaCha20-Poly1305, and many more. Message integrity checking, secure secret key exchange, and ECDH SSH key exchange algorithms. Easy to use SSH-enabled components supporting major Internet protocols. A complete unified framework with a common, easy-to-learn object model and simplified interfaces enable you to do more. Components are thread-safe on critical members. Fast, robust, reliable components that consume minimal resources. Native development components for all supported platforms and technologies. Rigorously tested, rock solid libraries that have undergone hundreds of thousands of hours of testing both internally by our QA team and externally through customer installations. Detailed reference documentation, sample applications, fully-indexed help files, and an extensive online knowledge base. Backed by multi-tier professional support, including free email support and enterprise-level paid support. Fully-managed .NET components based on a 100% C# codebase, with no dependencies on outside native code. The edition of choice for fully-managed .NET applications. Cross-platform support for Windows, Linux, macOS and anywhere .NET Standard is supported. Native libraries are also available for individual platforms. Fully-managed .NET components written in C#. .NET Standard 2.0 and 2.1 support. Support for .NET 6, .NET 5, .NET Core 3.1, and earlier. Works with Xamarin via .NET Standard. Support for XCOPY deployment in ASP.NET. Support for Windows IoT. Comprehensive integrated product documentation. Seamless integration with Visual Studio. Support for .NET Framework 2.0 - 4.8. Extensive demo applications for WinForms and WebForms (ASP.NET) written in VB.NET and C#. Pure Java Classes for Internet Programming. The very same components as in other editions of the product, translated in Pure Java for extreme portability across platforms. Pure Java Classes. Includes an extensive library of pure Java demo applications. J2EE version is optimized for server side development. Seamless integration with popular development environments including [Builder, Eclipse, and IntelliJ]. Support for JDK version 1.5 and up. C++ classes packaged in 32-bit & 64-bit Windows DLLs, and C++ libraries that can be compiled against many Unix flavors, including but not limited to Linux, Solaris, macOS, AIX, FreeBSD, etc. The edition of choice for C++ programming on any platform or C++ development technology. 32-bit & 64-bit C++ class libraries (Windows DLLs). C++ libraries for Unix (Linux, Solaris, FreeBSD, macOS, etc.). C++ ARM Support. Extensive console demo applications. Demo applications and comprehensive documentation. Obfuscated source code available with the Red Carpet Subscription. Seamless integration with popular development environments including Microsoft Visual C+++. Dynamic library for macOS development using Swift & Objective-C on Intel and Apple Silicon (ARM64). Modern XCFrameworks for building high performance macOS and iOS applications with blazing connectivity capabilities. Support for native Swift development (including Swift 5) XCFramework packaging for macOS, iOS, iOS simulator, and Catalyst projects Full support for Intel and Apple Silicon (ARM64) Easy integration in XCode 11+ Simplified support for Objective-C projects Extensive demo applications and comprehensive documentation Pure JavaScript classes with no additional dependencies. Optimized for use in Node.js and Electron. Pure JavaScript classes with no dependencies. Support for all major Node.js versions. Seamless integration with Visual Studio Code. Optimized for performance. Comprehensive product documentation with extensive sample applications. Seamless integration with Electron. Node.js packaged modules based on a highly optimized exceptionally responsive asynchronous socket architecture. Perfectly suited for real-time applications, the components provide blazing performance while consuming minimal system resources. Node.js packaged modules. Support for all major Node.js versions. Supported on Windows, Linux, and macOS. Comprehensive product documentation with extensive sample applications. Based on a highly-efficient asynchronous event-driven architecture that seamlessly extends Node.js applications with powerful connectivity. Obfuscated source code available with the Red Carpet Subscription. Native Delphi VCL components with no external dependencies. It features the same trustworthy components that come with other editions, available as native Delphi VCLs for real Delphi performance. Native Delphi VCL components. Extensive Delphi demo applications. Comprehensive integrated product documentation. Support for Lazarus IDE and Free Pascal. Support for Embarcadero Delphi 6, 7, Delphi 2005, Delphi 2006, Delphi 2007, Delphi 2009, and RAD Studio (2010, XE -> RAD Studio 11). Native Embarcadero C++ Builder components, written in C++ and compiled with the C++ Builder compiler for blazing performance. The natural choice for C++ Builder programming. Native C++ Builder components. Extensive C++ Builder demo applications. Comprehensive integrated product documentation. x86 and x64 platform support. Support for Embarcadero C++ Builder 2009, C++ Builder 2010, and RAD Studio (2010, XE -> RAD Studio 11). Cross-platform PHP component libraries / extensions for development on Windows, Unix, Linux, macOS, etc. 32-bit & 64-bit PHP libraries (Windows DLLs). PHP libraries for Unix (Linux, Solaris, FreeBSD, macOS, etc.). Support for PHP 8.0 Support for PHP 7 (Version 7.0, 7.1, 7.2, 7.3, and 7.4). Support for PHP 5 (Version 5.2, 5.3, 5.4 and 5.5). Seamless integration with popular development environments including Eclipse. Demo applications and comprehensive documentation. Obfuscated source code available with the Red Carpet Subscription. Python modules for Windows, Linux, and macOS featuring the same trustworthy components that come with other editions, available for use in Python 3. Python modules for Windows, Linux, and macOS. Support for Python 3. Extensive console demo applications. Easy installation using PIP. Demo applications and comprehensive documentation. Highly optimized pure JavaBeans for integrating blazing connectivity into Android applications. Pure Java Beans Optimized for Android. Includes an extensive library of pure Java demo applications. Seamless integration with popular development environments including Android Studio. Native Frameworks for building high performance iOS applications with blazing connectivity capabilities. Modern XCFramework with iOS, iOS simulator, and Catalyst frameworks for Intel and Apple Silicon (ARM64) iOS development. Support for Apple Swift development (Swift 5 support included). Seamless integration with popular development environments. Extensive demo applications and comprehensive documentation. Static library for legacy development environments. Obfuscated source code available with the Red Carpet Subscription. ActiveX Controls optimized for the Internet. Smaller, faster, and without dependencies on external libraries. The edition of choice for distributed ActiveX or COM supported Internet applications. Extensive demo applications for Visual Basic (VB4, VB5, and VB6), and ASP. Can be used from any environment that supports ActiveX including Visual Basic, VBScript, MS Office (Access, Excel etc.), Paradox, Clarion, Visual FoxPro, and more. Comprehensive integrated product documentation. High-performance Qt classes packaged in 32-bit & 64-bit Windows DLLs; and C++ libraries that can be compiled against Linux, macOS, FreeBSD, and more. The edition of choice for Qt development on any platform. 32-bit & 64-bit C++ class libraries (Windows DLLs). C++ Libraries for Unix (Linux, macOS, FreeBSD, etc.). Support for Qt 4.8 and Qt 5. Qt GUI demo applications and comprehensive documentation. Seamless integration with Qt Creator. Obfuscated source code available with the Red Carpet Subscription. The following demos are installed with the product. Download the FREE trial to get started. Full-featured certificate management sample. Demonstrates how to list, manage,... ASP.NET, Delphi, Java (GUI), C#, VB.NET, Qt, C++, VB Shows how to use the SExec component to remotely and securely execute commands. Android, ASP.NET, C++ Builder, Mac/Cocoa, Delphi, Mac/iPhone, Java (GUI), Java ... A full featured SCP client built using the SCP component. It allows browsing of... ASP.NET, C++ Builder, Mac/Cocoa, Delphi, Mac/iPhone, Java (Console), JavaScript, ... Shows how to use the SShell component to remotely and securely execute commands. C++ Builder, Delphi, Java (GUI), JavaScript, C#, VB.NET, Node.js, VB This demonstrates the use of SSHDaemon to build a simple SSH-Enabled server. C++ Builder, Delphi, C#, VB.NET, VB, Visual C++ A full featured SFTP client built using the SFTP component. It allows browsing of... Android, ASP, ASP.NET, C++ Builder, Mac/Cocoa, Delphi, Mac/iPhone, Java (GUI), Java ... Shows how to build a simple SFTP Server. Delphi, Java (Console), JavaScript, Kotlin, C#, VB.NET, Node.js, Python Script This demo shows how to use the SSHClient to establish a secure connection to any... Java (GUI), C#, VB.NET, VB Shows how to use the SSHFlex component to perform SFTP, SCP, SExec and SShell... Java (Console), Kotlin, C#, VB.NET Uses the SSHReverseTunnel component to connect to an SSH server and request port... JavaScript, C#, VB.NET, Node.js, Python Script, VB Uses the SSHTunnel component to accept incoming plain text connections and tunnel... Delphi, Java (GUI), JavaScript, C#, VB.NET, Node.js, Python Script Get started today and see why developers worldwide choose in software components. Download IPWorks SSH includes everything needed to add Secure SSH Communications to any application - on any platform or development technology. Order
